

Measuring Activity 1

Around your home, find some different objects and estimate how long you think they are in centimetres (cm).

Write your **estimate** in the box next to the items name. Then, using a ruler or measuring tape, accurately measure the object and put its **actual** length in the right box.

Items	Estimate (cm)	Actual Length (cm)

Measuring Activity 2

Using a ruler, can you draw lines that match the length

10cm	
15cm	
8.5cm	
85mm	
25mm
