

Year 3 Number Place Value and Number Fluency

[illegible]

Year 3 Addition and Subtraction and Multiplication and Division

	3AS–1 Calculate complements to 100.	3AS–2 Add and subtract up to three-digit numbers using columnar methods.	3AS–3 Manipulate the additive relationship: Understand the inverse relationship between addition and subtraction, and how both relate to the part–part–whole structure. Understand and use the commutative property of addition, and understand the related property for subtraction.	3MD–1 Apply known multiplication and division facts to solve contextual problems with different structures, including quotative and partitive division.

Year 3 Fractions and Geometry

	3F–1 Interpret and write proper fractions to represent 1 or several parts of a whole that is divided into equal parts.	3F–2 Find unit fractions of quantities using known division facts (multiplication tables fluency).	3F–3 Reason about the location of any fraction within 1 in the linear number system.	3F–4 Add and subtract fractions with the same denominator, within 1.	3G–1 Recognise right angles as a property of shape or a description of a turn, and identify right angles in 2D shapes presented in different orientations.	3G–2 Draw polygons by joining marked points, and identify parallel and perpendicular sides.

Year 4 Number Place Value and Number Fluency

	4NPV–1 Know that 10 hundreds are equivalent to 1 thousand, and that 1,000 is 10 times the size of 100; apply this to identify and work out how many 100s there are in other four-digit multiples of 100.	4NPV–2 Recognise the place value of each digit in four-digit numbers, and compose and decompose four-digit numbers using standard and nonstandard partitioning.	4NPV–3 Reason about the location of any fourdigit number in the linear number system, including identifying the previous and next multiple of 1,000 and 100, and rounding to the nearest of each.	4NPV–4 Divide 1,000 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in multiples of 1,000 with 2, 4, 5 and 10 equal parts.	4NF–1 Recall multiplication and division facts up to 12 x 12, and recognise products in multiplication tables as multiples of the corresponding number	4NF–2 Solve division problems, with two-digit dividends and one-digit divisors, that involve remainders, and interpret remainders appropriately according to the context.	4NF–3 Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 100)

Year 4 Addition and Subtraction and Multiplication and Division

	3AS–1 Calculate complements to 100.	3AS–2 Add and subtract up to three-digit numbers using columnar methods.	3AS–3 Manipulate the additive relationship: Understand the inverse relationship between addition and subtraction, and how both relate to the part–part–whole structure. Understand and use the commutative property of addition, and understand the related property for subtraction.	4MD–1 Multiply and divide whole numbers by 10 and 100 (keeping to whole number quotients); understand this as equivalent to making a number 10 or 100 times the size.	4MD–2 Manipulate multiplication and division equations, and understand and apply the commutative property of multiplication.	4MD–3 Understand and apply the distributive property of multiplication.

Year 4 Fractions and Geometry

	4F–1 Reason about the location of mixed numbers in the linear number system.	4F–2 Convert mixed numbers to improper fractions and vice versa.	F–3 Add and subtract improper and mixed fractions with the same denominator, including bridging whole numbers	4G–1 Draw polygons, specified by coordinates in the first quadrant, and translate within the first quadrant.	4G–2 Identify regular polygons, including equilateral triangles and squares, as those in which the side-lengths are equal and the angles are equal. Find the perimeter of regular and irregular polygons.	4G–3 Identify line symmetry in 2D shapes presented in different orientations. Reflect shapes in a line of symmetry and complete a symmetric figure or pattern with respect to a specified line of symmetry

Year 5 Number Place Value and Number Fluency

	5NPV–1 Know that 10 tenths are equivalent to 1 one, and that 1 is 10 times the size of 0.1. Know that 100 hundredths are equivalent to 1 one, and that 1 is 100 times the size of 0.01. Know that 10 hundredths are equivalent to 1 tenth, and that 0.1 is 10 times the size of 0.01.	5NPV–2 Recognise the place value of each digit in numbers with up to 2 decimal places, and compose and decompose numbers with up to 2 decimal places using standard and nonstandard partitioning	5NPV–3 Reason about the location of any number with up to 2 decimals places in the linear number system, including identifying the previous and next multiple of 1 and 0.1 and rounding to the nearest of each.	5NPV–4 Divide 1 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in units of 1 with 2, 4, 5 and 10 equal parts.	5NPV–5 Convert between units of measure, including using common decimals and fractions.	5NF–1 Secure fluency in multiplication table facts, and corresponding division facts, through continued practice.	5NF–2 Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 1 tenth or 1 hundredth).

Year 5 Addition and Subtraction and Multiplication and Division

	3AS–1 Calculate complements to 100.	3AS–2 Add and subtract up to three-digit numbers using columnar methods.	3AS–3 Manipulate the additive relationship: Understand the inverse relationship between addition and subtraction, and how both relate to the part–part–whole structure. Understand and use the commutative property of addition, and understand the related property for subtraction.	5MD–1 Multiply and divide numbers by 10 and 100; understand this as equivalent to making a number 10 or 100 times the size, or 1 tenth or 1 hundredth times the size.	5MD–2 Find factors and multiples of positive whole numbers, including common factors and common multiples, and express a given number as a product of 2 or 3 factors.	5MD–3 Multiply any whole number with up to 4 digits by any one-digit number using a formal written method.	5MD–4 Divide a number with up to 4 digits by a one-digit number using a formal written method, and interpret remainders appropriately for the context.

Year 5 Fractions and Geometry

	5F–1 Find non-unit fractions of quantities.	5F–2 Find equivalent fractions and understand that they have the same value and the same position in the linear number system.	5F–3 Recall decimal fraction equivalents for $\frac{1}{2}$, $\frac{1}{4}$, and $\frac{3}{4}$, and for multiples of these proper fractions.	5G–1 Compare angles, estimate and measure angles in degrees ($^{\circ}$) and draw angles of a given size.	5G–2 Compare areas and calculate the area of rectangles (including squares) using standard units.

Year 6 Number Place Value and Number Fluency

	6NPV–1 Understand the relationship between powers of 10 from 1 hundredth to 10 million, and use this to make a given number 10, 100, 1,000, 1 tenth, 1 hundredth or 1 thousandth times the size (multiply and divide by 10, 100 and 1,000).	6NPV–2 Recognise the place value of each digit in numbers up to 10 million, including decimal fractions, and compose and decompose numbers up to 10 million using standard and nonstandard partitioning.	6NPV–3 Reason about the location of any number up to 10 million, including decimal fractions, in the linear number system, and round numbers, as appropriate, including in contexts.	6NPV–4 Divide powers of 10, from 1 hundredth to 10 million, into 2, 4, 5 and 10 equal parts, and read scales/number lines with labelled intervals divided into 2, 4, 5 and 10 equal parts.	5NPV–5 Convert between units of measure, including using common decimals and fractions.	5NF–1 Secure fluency in multiplication table facts, and corresponding division facts, through continued practice.	5NF–2 Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 1 tenth or 1 hundredth).

Year 6 Addition and Subtraction and Multiplication and Division

	6AS/MD–1 Understand that 2 numbers can be related additively or multiplicatively, and quantify additive and multiplicative relationships (multiplicative relationships restricted to multiplication by a whole number).	6AS/MD–2 Use a given additive or multiplicative calculation to derive or complete a related calculation, using arithmetic properties, inverse relationships, and place-value understanding.	6AS/MD–3 Solve problems involving ratio relationships.	6AS/MD–4 Solve problems with 2 unknowns.

Year 6 Fractions and Geometry

	6F–1 Recognise when fractions can be simplified, and use common factors to simplify fractions.	6F–2 Express fractions in a common denomination and use this to compare fractions that are similar in value.	6F–3 Compare fractions with different denominators, including fractions greater than 1, using reasoning, and choose between reasoning and common denomination as a comparison strategy.	6G–1 Draw, compose, and decompose shapes according to given properties, including dimensions, angles and area, and solve related problems.
