

Anti-litter policy

All members of the school community have the right to work and play in a safe, pleasant and happy environment.

This includes a clean and tidy environment.
It is our goal to create a litter-free school.

We should recycle as much as possible.

We should carry this behaviour outside school, into the community and our homes.

Everybody has the right to suggest ways to improve the school environment.

Any litter from snacks should be responsibly disposed of.
However we do get blown litter into the school grounds, we should deal with it as below.

All members of the school community should:

- Not to create litter
- To use recycling facilities where appropriate
- To pick-up litter which is lying around

All staff have a responsibility to support pupils in their efforts to deal with litter problems.

The Caretaker should:

- To empty the outside waste bins.
- To arrange and co-ordinate waste disposal from the site.

The ECO C.A.T.s should:

- Listen to possible suggestions on how to improve various environments.
- To make sure anti-litter is talked about in school.
- To arrange regular litter picks around the school grounds.
