

Mundy C of E Junior School

Biodiversity Policy

Aim: To conserve biodiversity health, enjoyment and wellbeing for our children, staff and community now and in the future.

- To stop the loss of habitats within the school grounds and reverse previous losses caused by the building of the school with targeted action. To monitor as we go.
- To help increase awareness and understanding of our native flora and fauna and engage as much of the school community as possible.
- To take into account any future decisions which may affect the biodiversity achieved within the grounds.
- To ensure everything we learn is passed onto the children, so they can make the best possible decisions in the future.
- To educate the children on worldwide issues.
