2024

We look after all the animals that use our school grounds as their home. We grow fruit and vegetables in our class allotments and compost any waste from the school kitchens.

We will save water and energy by turning off lights and taps and collecting rain water , turning down radiators and shutting down IT equipment.

We will collect plastic and ensure that it is recycled responsibly.
We don't use balloons & glitter anymore.
We will help to look after our beaches.
Marine

We will pick up litter, even if it isn't ours and put it in the bins.
We will check that the outdoor bins need emptying once a week.
We will help keep our community clean.

We will look after ourselves by eating healthy food, drinking plenty of water and doing exercise.

We will recycle, repair, reuse and reduce wherever possible.

We will help other people that need help by raising money and talking to our community about them. In this country as well as others.

We will encourage different ways to travel to school that are better for us and the environment.
Using scooters, walking, cycling, park & stride

To continue developing our biodiversity in school by introducing more habitats and flowers.

Collecting data to show how much paper we are using in school. Encouraging different printing practices to reduce waste.
